

What is Sales Enablement?

Hitting sales quotas consistently requires sales professionals to have first-class selling skills and well-developed knowledge of their company's product, the market, trends, customer needs and competitive landscape

Key challenges

- ▶ **Short on time:** Upcoming product launch or campaign requires your sales force or channel partners to be fully trained and supported to deliver the expected revenue goals. You need resources asap for your launch readiness.
- ▶ **Limited resources:** Your internal team is either maxed out or has insufficient expertise in developing critical sales enablement such as: training webinars or on-demand courses, sales playbooks, call scripts, competitive battle cards, cheat sheets, and channel partner enablement.

Client Testimonials

“ As we grow rapidly, we saw the need for greater rigor in scaling our selling process, systems, seller competencies, approach and more. Aventi Group’s executive came in with a methodology to benchmark our selling model and recommended specific areas for increased focus. We also tapped Aventi to support extensive sales enablement and prep for a strategic launch of our BambooHR product line. The Aventi leader ran through several role playing sessions, delivered the live sales rep and sales management trainings, and built a sales playbook that was foundational going forward. ”

– **Jeff Adams, Chief Revenue Officer, BambooHRs**

“ With Aventi Group, we were able to break through our quarterly sales plateau and now we are seeing a hockey stick type of growth. The work Aventi did was the foundation for my team; the coaching their executive gave me helped me understand the gaps with the sales organization and individuals, and helped me put the right processes in place, along with the training/support/reporting needed to successfully scale and manage our sales team. ”

– **Zubin Irani, Chief Executive Officer, cPrime**
